Introduction

This document is part of IDEA project education program against the energy poverty and represents the theoretical part of the curriculum.

General objectives of the IDEA educational program are:

- Raise awareness of European citizens on the rising issue of energy poverty;
- Contribute to solving the issue of energy poverty and simultaneously address the issue of climate change;
- Reinforce adult skills and competencies in the field of energy poverty and energy advising;
- Help the unemployed to identify energy advising as an opportunity for them to find new job opportunities.

About the project

IDEA (Innovative Direction in Energy Advising) project's purpose is to develop innovations in education about energy poverty. Main objective is to improve existing and develop new innovative educational methods and materials for adult training on energy poverty. The partnership consists of experienced organizations strategically places in the most affected region regarding energy poverty - in Bulgaria, Croatia, Slovenia and Cyprus. Project is implemented by University of Cyprus, DOOR Society for Sustainable Development Design, Energy Agency Plovdiv and Focus Association for Sustainable Development. It is funded by Erasmus+ programme.
